

PreferredOne Response to coverage of at-home rapid COVID-19 tests:

Beginning January 15, 2022 and continuing through the end of the COVID-19 federal public health emergency, plans will cover the cost of a limited number of at-home rapid COVID-19 tests.

- Members should be directed to their pharmacy network to purchase test kits.
- Any member that does not go through the pharmacy network will be eligible for manual reimbursement under the pharmacy benefit, which is capped at \$12 per test. A Rx claim form is attached for this purpose.

Additional Notes:

- Only kits from approved sellers are allowed (Cannot purchase resale from eBay and submit for reimbursement)
- Many kits contain 2 tests and will be eligible for up to \$24 reimbursement
- Shipping and Handling is not typically covered
